

Jean-Mari Hellig Consult Industrial Engineer vacancies Requirements:-

Tertiary qualification in industrial engineering.

At least 1-year of working experience in a manufacturing environment.

Ability to manage small details without losing sight of the big picture.

Ability to work in a team and influence others to achieve positive outcomes.

Excellent communication: ability to communicate complex ideas in simple, clear and concise terms, both upwards to senior management and downwards to frontline workers.

Strong analytical and problem-solving ability.

Strong Excel analytical skills (adding a coding language such as Python would be a plus).

Decisive and assertive in working with and leading others to achieve successful outcomes for projects.

Uncompromising in delivering a high standard of work.
